DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, claims 1-89 and 130-156, further electing the glass fibers, thermosetting resin and twisted fibers in the reply filed on March 17, 2005 is acknowledged.

Upon further consideration it has been determined that the elected Group I is subject to additional election of species. The modified requirement is as follows:

2. This application contains claims directed to the following patentably distinct species of the claimed invention:

- I. Claims 1-11 and 43-63, drawn to a composite core with a plurality of fibers;
- II. Claims 12-21 and 137-156, drawn to a composite core with a concentric core having an inner layer and at least one outer layer;
- III. Claims 64-89 and 130-136, drawn to a composite core having a first layer comprising a first composite and at least one other layer comprising a second composite.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
